5.11 AGT-2304 – Upload Document of Different File Type 13

5.12 AGT-2306 – Prevent Closing of the Training Video 15
5.13 AGT-2315 – Online Viewer – Performance Improvement on Already Opened Documents 15
5.14 AGT-2319 – Update Productive SSL Certificates 16
5.15 AGT-2320 – Online Viewer – Introduce Paging to Improve Performance 16
5.16 AGT-2326 – Associate a Default Artifact to a Document Link 17
5.17 AGT-2347 – Display an Error Message to Users with No Organization Access 18
5.18 AGT-2348 – Filter on Metadata Group 18
5.19 AGT-2349 – Display Document Shortcuts in Views 19
5.20 AGT-2352 – Alignment of the Agatha Footer 19
5.21 AGT-2374 – Back button moved to top of the task page 20
6 Known issues 21

1 Release Scope

Agatha has released Agatha Cloud Service release 2.14. The following sections describe the functional improvement provided as part of this release as well as the defects addressed by that release.

2 List of changes

2.1 Functional Improvement

The following functional changes are provided as part of the release.

Issue key	Summary
AGT-587	Provide ability for users to authenticate using time-based one-time password in addition to their regular password (2 factor authentication).
AGT-1411	Provide the ability to resize the width of the treeview in folder view.
AGT-1578	Provide the ability to restrict the access to Agatha from specific IP ranges.
AGT-1848	Provide the ability to add a new document directly from the Add Attachment "document link" window.
AGT-1850	Provide the ability to display specific placeholders in the "add document" window.
AGT-1913	Add a label for the "icon" field (in the manual trigger of a job in the admin settings).
AGT-1933	In the Lifecycle management page, provide a way to specify a list of "Reasons for signing" per step.
AGT-2074	Add the possibility for users that have completed a Parallel Review task to go back and view the annotations made in the completed tasks.
AGT-2080[2]	Add the ability to bcc a group of users to workflow emails sent by the system.
AGT-2301	Add an explicit error message if a user is trying to import a password protected Zip file (using folder import).
AGT-2304	Provide the ability to upload a new document version that is of a different type.
AGT-2306	When first connecting to Agatha, remove the ability for users to close the training video window.
AGT-2315	Online Viewer - Improve the performance when displaying documents that have already been opened by a user in the past.
AGT-2319[3]	Update Productive SSL certificates.
AGT-2320	Introduce paging in the online viewer/annotations to improve rendering performance on the client side.
AGT-2326	Provide the ability to associate a "default artifact" to a document link metadata so this artifact is used to quickly attach a document.
AGT-2347	When a user does not have access to any organization, display a message to the user instead of having the user to be stuck in an infinite loop.
AGT-2348	Add the ability to filter on a metadata group using the group name in the view definition.
AGT-2349	Provide the ability to display document shortcuts in views.
AGT-2352	Properly align the Agatha footer to the bottom of the page.
AGT-2374	Move the “back” button to the top of the task pages.

[2]Part of 2.13.2 patch. [3]Part of 2.13.3 patch.

2.2 Defect Closure

The following defects have been closed as part of this release.

Issue key	Support #	Summary
AGT-1675		Include the "change of document link" metadata in the documents version history page.
AGT-1747		A technical error is displayed when a user enters an Extended Metadata longer than 128 characters. A functional error should be displayed instead.
AGT-2085		Annotations - "Close" button is not working in Firefox.
AGT-2087		Online Viewer - A space is missing between "Close" and the user name, and between the user name and "Sign out" on Internet Explorer.
AGT-2095[2]	5348	Annotations - Last name and First name are reversed in the comments
AGT-2100	5309	Online Viewer - Improve the performance when navigating between pages.
AGT-2116	5271	Grouping of views is not correct in some cases.
AGT-2144		ArtifactMilestoneName is not translated in the document property page.
AGT-2300[2]	5446	Some columns are showing up as "invalid date" in the Excel export of a view.
AGT-2307		Unexcusing an artifact, a country or a site, does not recreate the placeholder that have the keep placeholder option enabled, if a document was created from this placeholder.
AGT-2321[2]		Sometimes add document from placeholder is displaying the Extended metadata of the workspace default artifact instead of showing the extended metadata of the placeholder artifact.
AGT-2322[2]		In the review workflow, the task completion notification is not sent to the workflow initiator (test made with option "Send me a notification when each task of the workflow is completed by a participant." checked.)
AGT-2323[2]		The create from template is broken since deployment of 2.13 (regression)
AGT-2325[2]		When the review task is created, the step number is not tracked in the task list (regression since 2.13)
AGT-2327		Export to Excel does not work on grouped views.

[2]Part of 2.13.2 patch.

4 Support and Problem Reporting

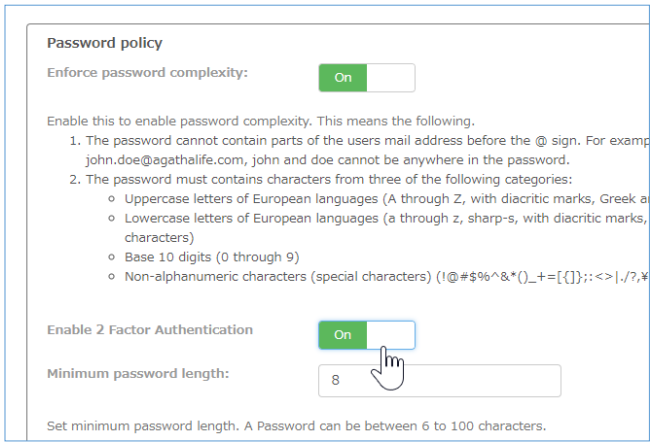
Support inquires can be routed through standard Agatha Support process by email at support@agathalife.com .

5 Detailed Description of the Functional Changes

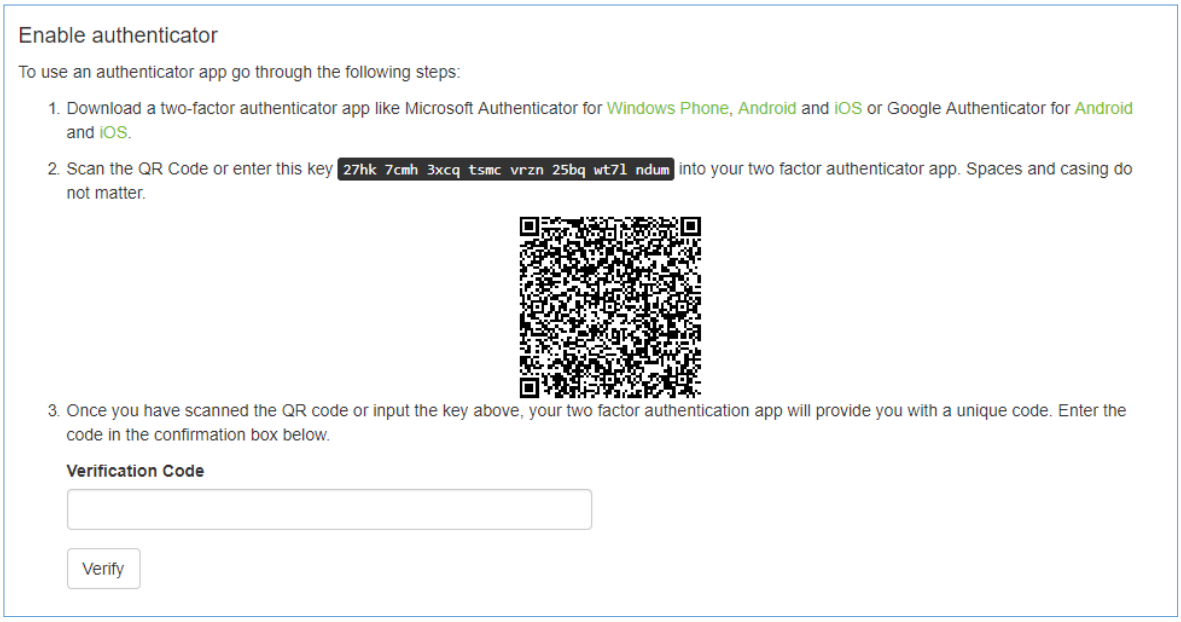
5.1 AGT-587 – 2-Factor Authentication

Issue key	Summary
AGT-587	Provide ability for users to authenticate using time-based one-time password in addition to their regular password (2 factor authentication).
Scope	This enhancement is provided to all users of an organization. It is disabled by default and can be activated by administrators having access to the Misc. settings of an organization.

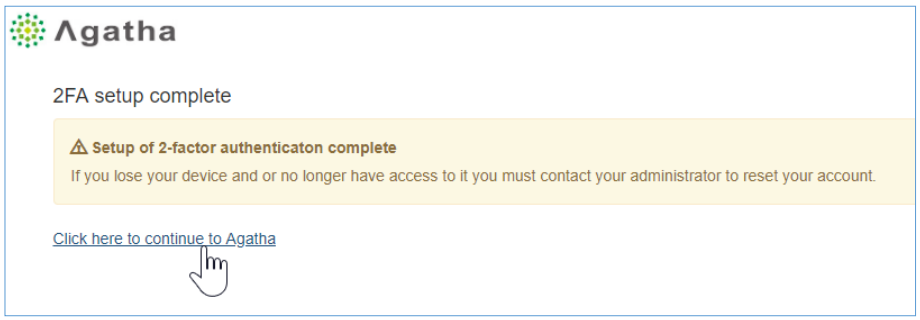
In the Misc. settings of a workspace, in the password policy section, a new option has been added to enable 2-factor authentication.



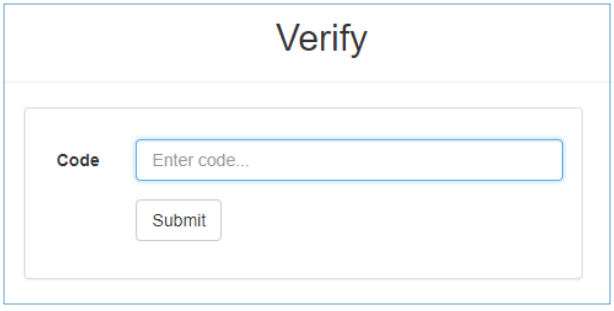
A page is displayed to register a device that will be used to generate the code used for the 2-factor authentication. Instructions are displayed on the screen:



After entering the code displayed on the device, a confirmation window is displayed.



Next time the user logs into Agatha, after providing his/her login and password, a window appears to collect the code displayed on the registered device.

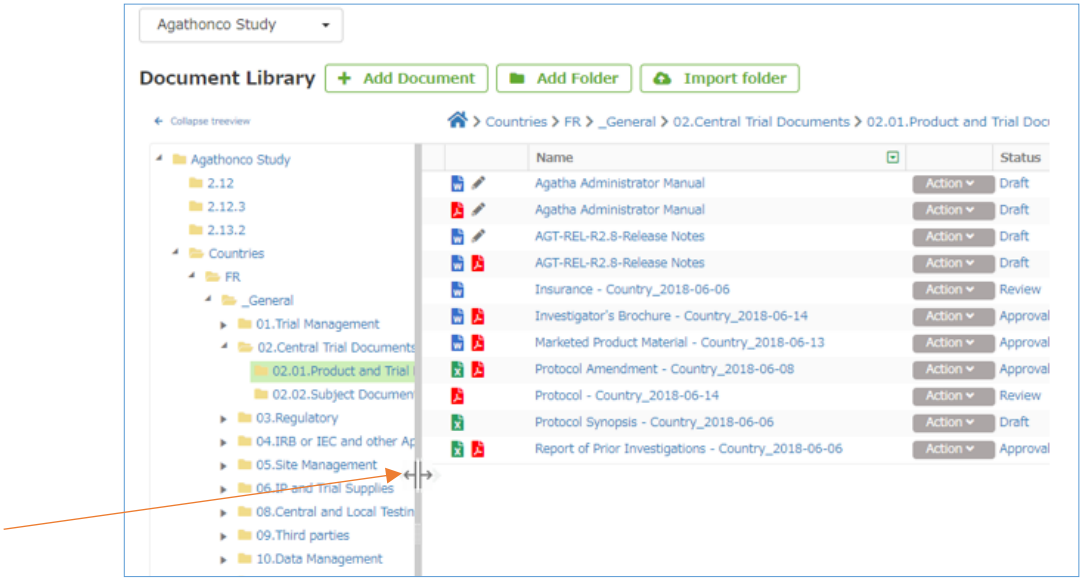


After submitting the code, the user is logged into Agatha.

5.2 AGT-1411 – Resize of Tree View in Folder Views.

Issue key	Summary
AGT-1411	Provide the ability to resize the width of the treeview in folder view.
Scope	This enhancement is provided to all users.

It is now possible to resize the width of the tree view by moving the vertical bar.



5.3 AGT-1578 – IP Restriction

Issue key	Summary
AGT-1578	Provide the ability to restrict the access to Agatha from specific IP ranges.
Scope	This enhancement is provided to Agatha Support only.

This functionality is only provided to Agatha Support. Please contact your Agatha representative if you need more information.

5.4 AGT-1848 – Add a new document directly from the Add Attachment "document link" window.

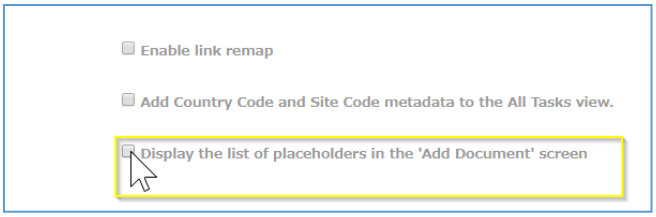
Issue key	Summary
AGT-1848	Provide the ability to add a new document directly from the Add Attachment "document link" window.
Scope	This enhancement is provided to Agatha Support only.

This functionality is only provided to Agatha Support. Please contact your Agatha representative if you need more information.

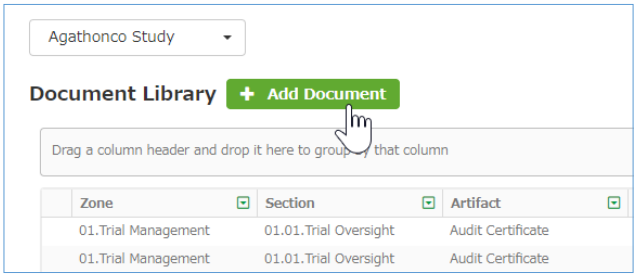
5.5 AGT-1850 – Display Placeholders in the “Add Document” window

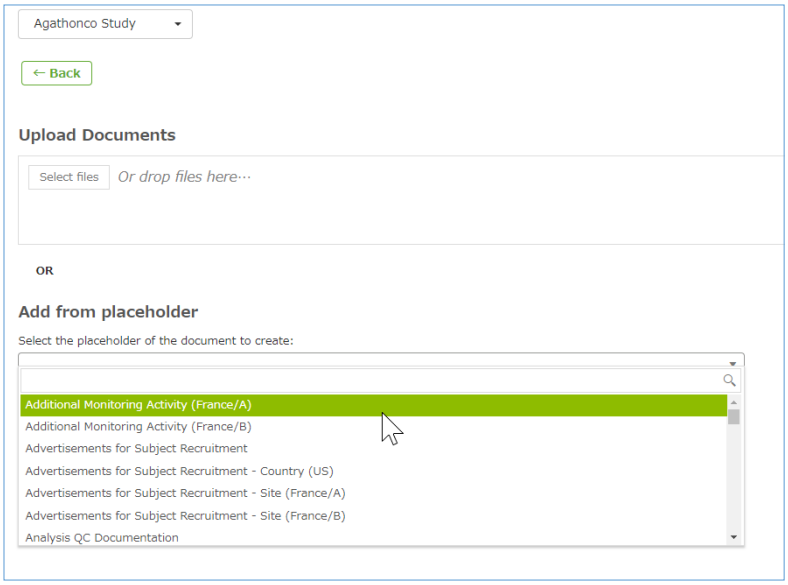
Issue key	Summary
AGT-1850	Provide the ability to display specific placeholders in the "add document" window.
Scope	This enhancement is provided to administrators having access to the Misc. settings of an organization.

A new option has been added in the Misc. settings of a workspace:

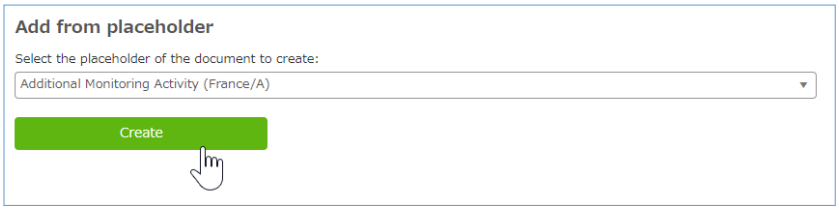


When this option is activated, when navigating to the “Add document” screen, a new “Add from placeholder” option is displayed at the bottom of the page that displays the list of all of the placeholders available in the workspace.





After selecting a placeholder, a “Create” button is displayed to create a document from this placeholder.



5.6 AGT-1913 – Label for Icon Field in Job Settings

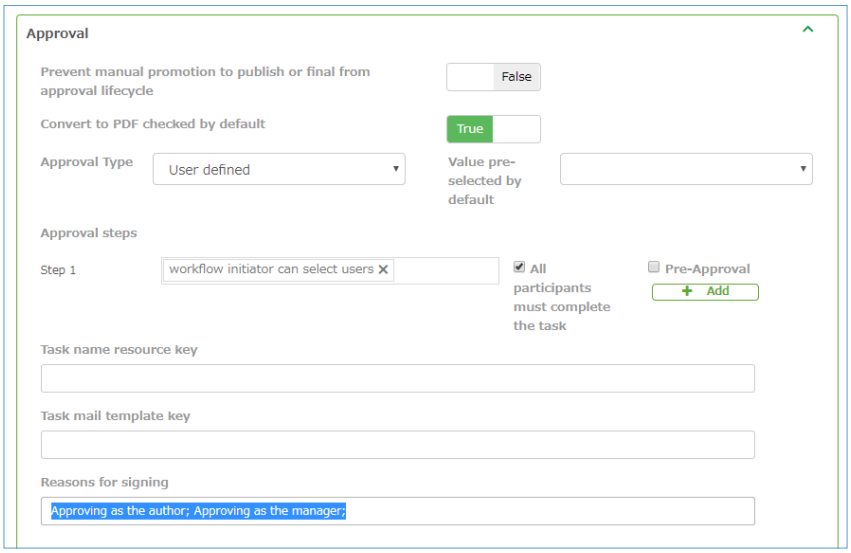
Issue key	Summary
AGT-1913	Add a label for the "icon" field (in the manual trigger of a job in the admin settings).
Scope	This enhancement is provided to Agatha Support only.

This functionality is only provided to Agatha Support. Please contact your Agatha representative if you need more information.

5.7 AGT-1933 – Custom Reason for Signing in Lifecycle Management

Issue key	Summary
AGT-1933	In the Lifecycle management page, provide a way to specify a list of "Reasons for signing" per step.
Scope	This enhancement is provided to administrators having access to the Lifecycle Management page.

It is now possible to configure “Reasons for signing”. Reasons are separated with semi columns “;”.



Once configured, the reasons for signing are displayed to the users when completing an approval task.

5.8 AGT-2074 – View Annotations in Completed Tasks

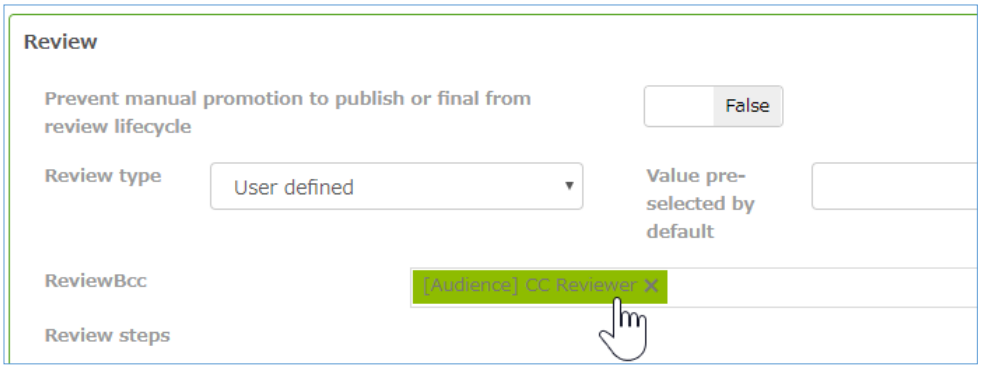
Issue key	Summary
AGT-2074	Add the possibility for users that have completed a Parallel Review task to go back and view the annotations made in the completed tasks.
Scope	This enhancement is provided to all users.

Users can see the comments they have added, even after the completion of the parallel review with annotations workflow. This option is available from the workflow history page.

5.9 AGT-2080 – Copy Users to Emails Sent in Workflows

Issue key	Summary
AGT-2080[2]	Add the ability to bcc a group of users to workflow emails sent by the system.
Scope	This enhancement is provided to administrators having access to the lifecycle management page.

In the lifecycle configuration page, it is now possible to configure Audiences that is included in carbon copy (bcc) of all the notifications sent by the Review or Approval workflows.



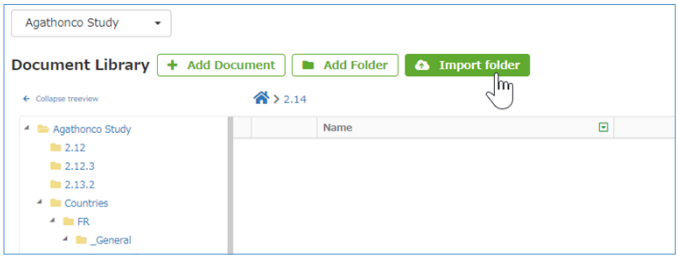
The users who are part of the selected audiences will be in bcc: of all workflow emails.

5.10 AGT-2301 – Error Message when Importing Password Protected Zip Files

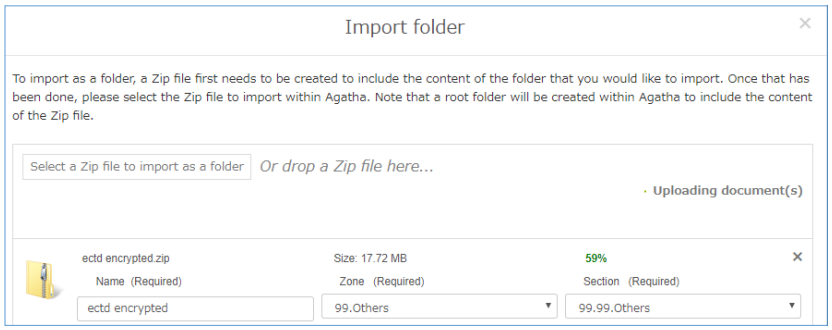
Issue key	Summary
AGT-2301	Add an explicit error message if a user is trying to import a password protected Zip file (using folder import).
Scope	This enhancement is provided to all users.

When uploading a Zip file that is password protected through the Folder Import functionality, an error message is displayed to the end user.

- Select “Import Folder”.



- Select a Zip file that is password protected and start the import.



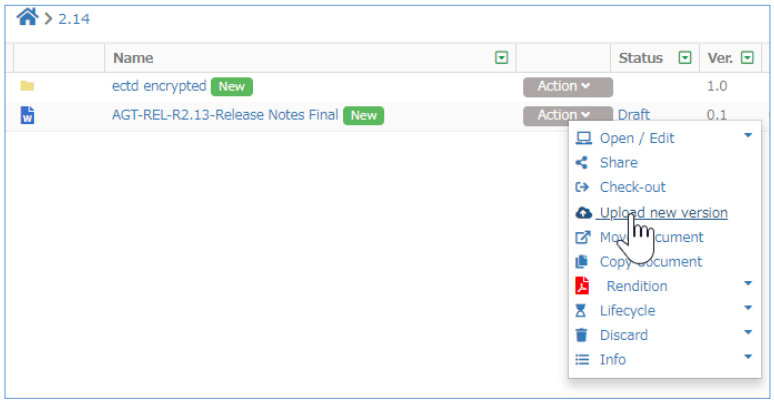
After the import, the system displays the following error message: "Agatha does not support the import of password protected Zip files."

5.11 AGT-2304 – Upload Document of Different File Type

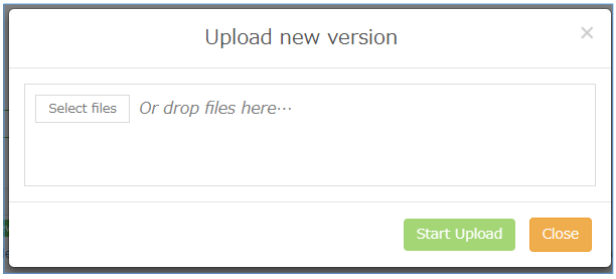
Issue key	Summary
AGT-2304	Provide the ability to upload a new document version that is of a different type.
Scope	This enhancement is provided to all users.

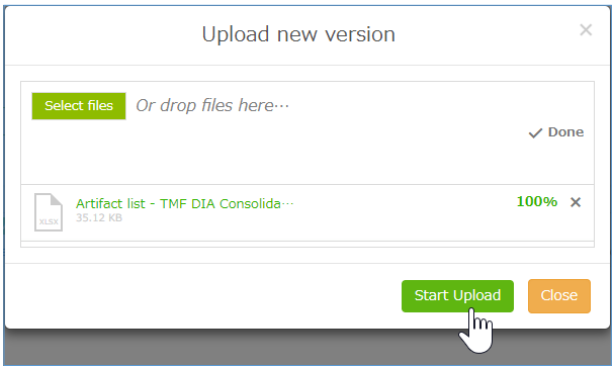
It is now possible to upload a new version of a document that is of a different type from the current document version.

- Select the action menu option “upload new version” of a document.

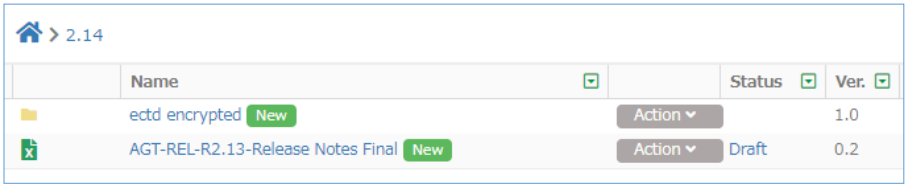


- Check-out the document and select a file of a different file type (in this example, the original document is a .docx document, and an Excel version is uploaded as a new version).

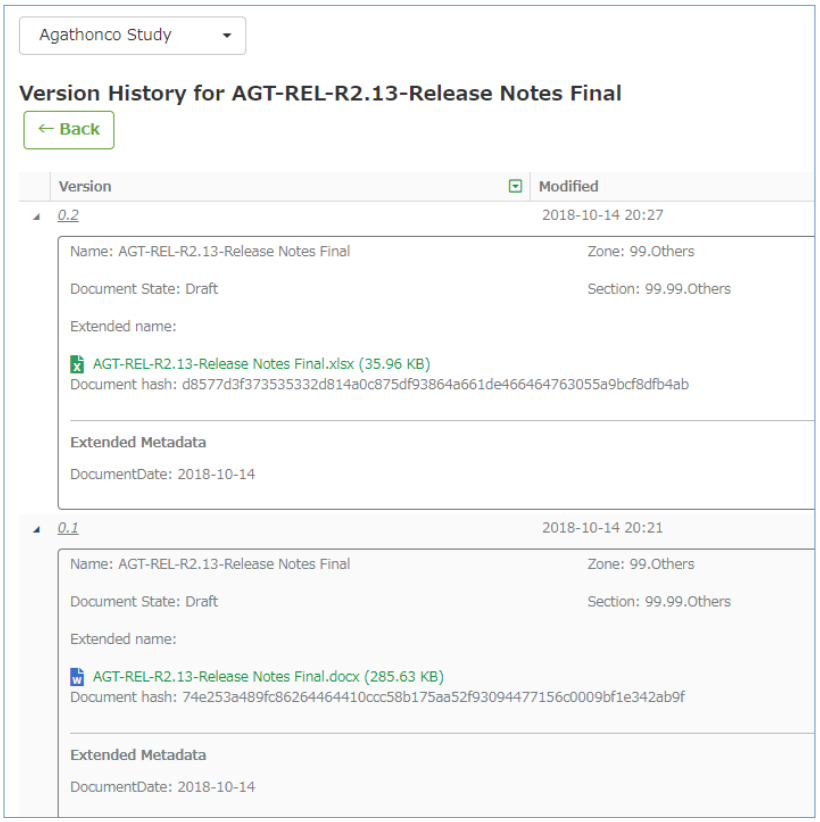




- After upload, and document check-in, the new version of the document is uploaded in the library.



The version history of the document outlines that the document type changed.

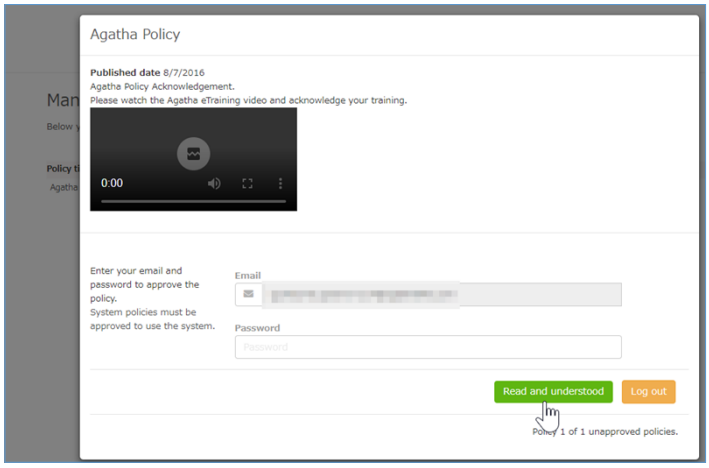


5.12 AGT-2306 – Prevent Closing of the Training Video

Issue key	Summary
AGT-2306	When first connecting to Agatha, remove the ability for users to close the training video window.
Scope	This enhancement is provided to all users.

Users cannot close the training video that is displayed the first time that they access to Agatha. They can only “Read and Understand” the video or reject it.

This is addressing a usability challenges on large screens where users did not see the buttons at the bottom of the screen and were closing the window (and were being logged out).



5.13 AGT-2315 – Online Viewer – Performance Improvement on Already Opened Documents

Issue key	Summary
AGT-2315	Online Viewer - Improve the performance when displaying documents that have already been opened by a user in the past.
Scope	This enhancement is provided to all users.

If documents have been opened in Agatha in the past by any user, the document will open faster in the online viewer (or annotation).

5.14 AGT-2319 – Update Productive SSL Certificates

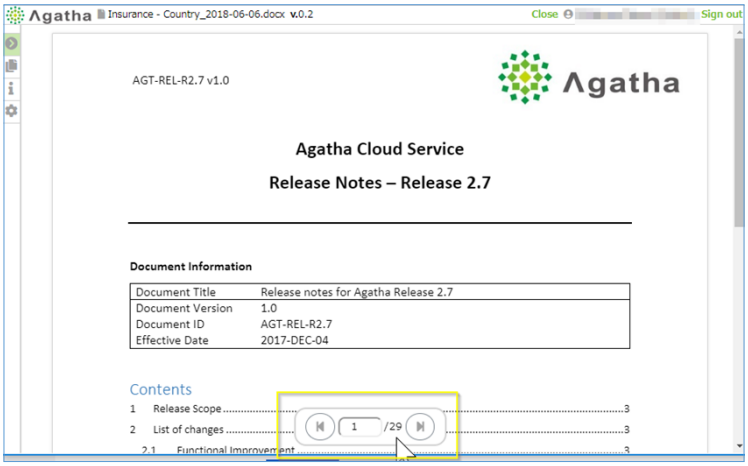
Issue key	Summary
AGT-2319[3]	Update Productive SSL certificates.
Scope	This enhancement is provided to all users.

SSL certificates of Agatha have been renewed for 3 months.

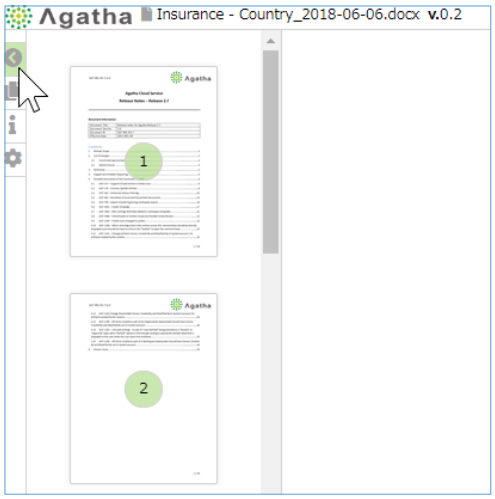
5.15 AGT-2320 – Online Viewer – Introduce Paging to Improve Performance

Issue key	Summary
AGT-2320	Introduce paging in the online viewer/annotations to improve rendering performance on the client side.
Scope	This enhancement is provided to all users.

To improve the performance of the online viewer / annotations, a paging mechanism has been added (and the continuous scrolling has been removed). The left and right arrows allow to move to the previous / next page. It is also possible to type the page to navigate to.



Note that when expanding the left panel, the action icons located on the left-hand side now remain at the same location.

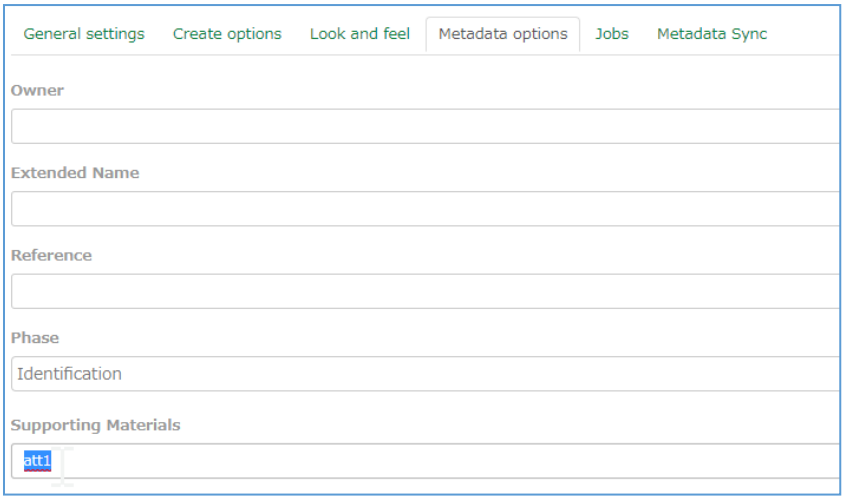


5.16 AGT-2326 – Associate a Default Artifact to a Document Link

Issue key	Summary
AGT-2326	Provide the ability to associate a "default artifact" to a document link metadata so this artifact is used to quickly attach a document.
Scope	This enhancement is provided to administrators having access to the metadata management page.

It is now possible to associate a default artifact to a document link metadata in the parameters of an artifact.

- Edit the artifact that includes a document link.
- In the “Metadata options”, add the default artifact number in the document link metadata.



When editing the document link from a web form, the system displays a link to directly add a document from the default artifact associated with the document link.

5.17 AGT-2347 – Display an Error Message to Users with No Organization Access

Issue key	Summary
AGT-2347	When a user does not have access to any organization, display a message to the user instead of having the user to be stuck in an infinite loop.
Scope	This enhancement is provided to all users.

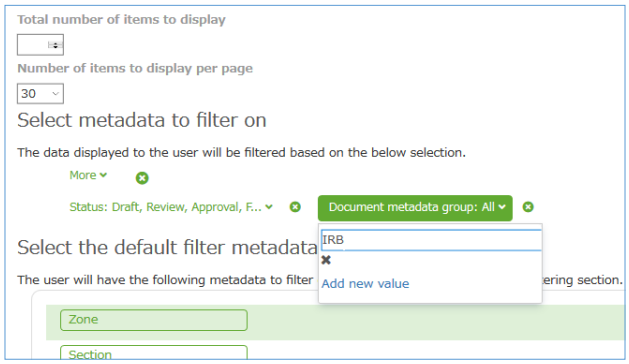
If a user does not have access to any organization, an explicit error message is displayed to the user after login.

5.18 AGT-2348 – Filter on Metadata Group

Issue key	Summary
AGT-2348	Add the ability to filter on a metadata group using the group name in the view definition.
Scope	This enhancement is provided to administrators having access to the metadata management and view settings.

It is now possible to filter views based on the metadata group of the artifact associated with the document.

- In the view settings, it is now possible to select “Document metadata group” as a filter parameter and to enter the name of a metadata group to filter on.

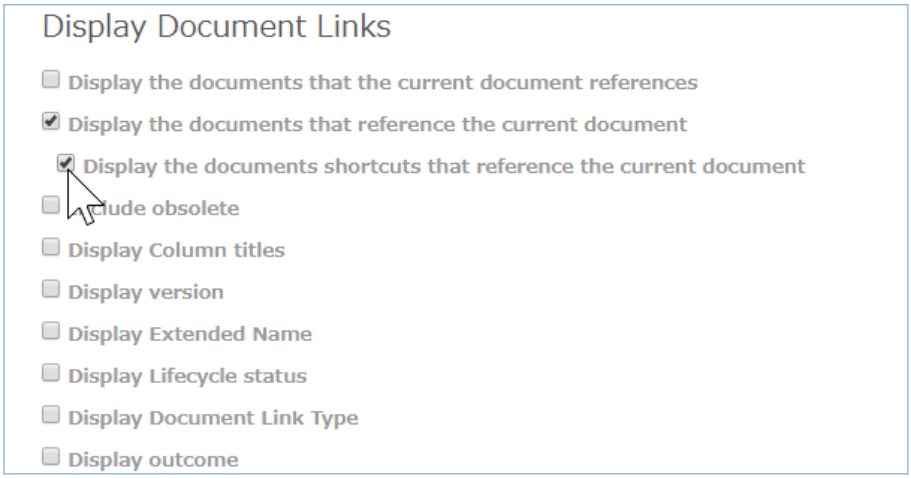


The associated view only displays documents from artifacts that have the associated document metadata group.

5.19 AGT-2349 – Display Document Shortcuts in Views

Issue key	Summary
AGT-2349	Provide the ability to display document shortcuts in views.
Scope	This enhancement is provided to administrators having access to the view settings.

A new option has been added in the view settings to display the document shortcuts (that are generated from the artifact link functionality) as an attachment to the parent document (in document views).



5.20 AGT-2352 – Alignment of the Agatha Footer

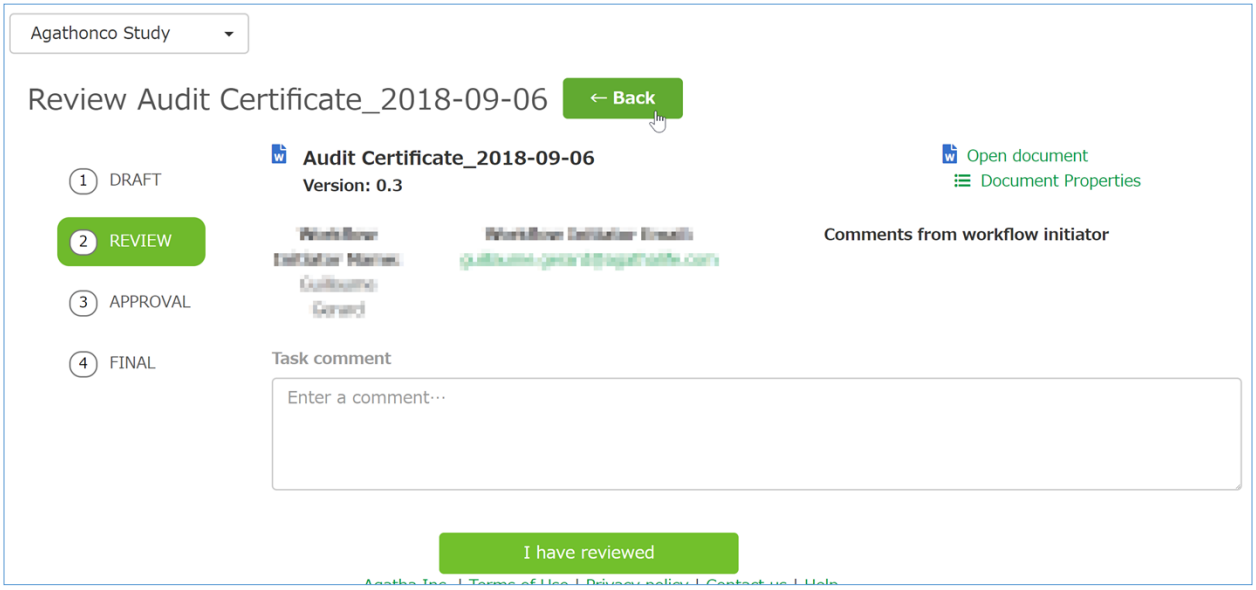
Issue key	Summary
AGT-2352	Properly align the Agatha footer to the bottom of the page.
Scope	This enhancement is provided to all users.

The footer of the page is better aligned in the center of the page.

5.21 AGT-2374 – Back button moved to top of the task page.

Issue key	Summary
AGT-2374	Move the "Back" button to the top of the task pages.
Scope	This enhancement is provided to all users.

The Back button is moved from the back to the top of the task pages for consistency reasons.



6 Known issues

The following defects remain open at the time of the release.

Issue key	Summary
AGT-20	Policy page. "Active to date" has wrong (past) date.
AGT-60	In folder view mode, after re-classifying a document, user should be redirected to the new location of document.
AGT-61	In the Documents View, grouping on multi-valued field fails. It is needed to disable grouping on multi value field (Lookup Multiple & Person Or Group multiple).
AGT-71	If a metadata value is modified (in Edit properties), the grouping is not refreshed for this specific metadata (only when it is part of a grouping).
AGT-123	Date extended metadata is not refreshed in real time when updated.
AGT-137	Document Links are not refreshed real time when a new version of the source document is created.
AGT-139	Artifact Link - If a source doc and the link are in the same view, and if a new version of the source doc is created, the link version is not updated by in real time. User needs to refresh the page
AGT-152	Opening a document link from properties window on source document, the Document property is not populated.
AGT-154	When a workflow fails, the workflow status is not updated.
AGT-161	Extended metadata of type "PersonOrGroup (Multiple)" is not displayed with empty value in the documents view.
AGT-166	Artifact setting. For Artifacts which already have documents, do not show Remove button.
AGT-183	View Groups can be created on locked workspaces.
AGT-207	Edit menu item is not available if document extension is upper case.
AGT-210	Ensure that document action menu is always opening within the visible screen.
AGT-218	Cannot terminate workflow that fails before a task has been created
AGT-244	PDF rendition - characters jump to next lines for specific Japanese documents.
AGT-258	Products are not translated in subscription page.
AGT-321	Add Jobs as part of workspace templates
AGT-409	When updating a view group, the details of the change is not tracked in the audit log
AGT-416	Cannot delete an empty group associate with a folder that has been deleted
AGT-422	Duplicated audit log entries when adding a user to Organization or Workspace
AGT-428	Add name of group in all User Group management pages
AGT-437	The view displayed in the Dashboard is not based on the audience configuration in some cases.
AGT-490	Selected language is not being retained when refreshing the page
AGT-530	Create new workspace. The green flush does not gone even after 10 mins.
AGT-557	Address an issue when the Copy Document function fails in some context

AGT-562	It is not possible to reset the user password when the password policy expiration is set to 1 day
AGT-590	Create document - prevent the submit action until all the data are loaded (site, country, ...)
AGT-594	If a user is added to the organization but to no workspaces, the user will not be able to access the organization dashboard.
AGT-595	When adding a new workspace while waiting for another one to be created, the parent workspace cannot be deselected.
AGT-635	For Readers group users who have Writers permission in other folders, "+ Add document" button is displayed. Show the button only when the user is in the folders the user has Writers permission.
AGT-660	Create PDF rendition from PDF fails in some scenarios.
AGT-666	Lock tasks that are part of a locked workspace
AGT-675	Add validation for new metadata fields when creating a workspace.
AGT-682	Validate all of the user input in the new document creation form
AGT-683	Validate user input in the Copy document form
AGT-684	Error opening files in Word or Excel that contain "/" in the document name
AGT-770	Some keys are not translated in the job window
AGT-782	Upon template creation, default views are not correctly selected
AGT-791	When Editing a document with Safari, Firefox or Internet Explorer, another Tab is opening in the browser
AGT-824	Error when reclassifying a Site-level artifact to a corporate-level artifact.
AGT-825	Address a formatting issue on the logout page.
AGT-858	In all documents folder view, the right hand window folder navigation is slow in some cases.
AGT-884	Filtering on lifecycle in folder view, does not show the folders.
AGT-907	Online Annotation: It is not possible to scroll using the mouse wheel if the cursor is on the document. Only works if the cursor is on the side in the comments area.
AGT-935	Credit card payment is not working in some cases.
AGT-950	Import folder is generating an error in some cases.
AGT-959	Annotations - when starting a review, switching from regular to parallel review should populate the reviewers from what has been entered in regular input text "step 1".
AGT-961	Annotations - Parallel review comments are not integrated back at the right location in Microsoft Word in some cases.
AGT-973	Technical Error is displayed in the browser logs when opening the send to review modal with Internet Explorer.
AGT-981	When resizing IE on the online viewer there is a white border at the bottom of the window.
AGT-989	The Month should be in 3 letter code in workflow status page.
AGT-1000	Clicking 2 times on action menu while the spinning wheel of the action menu is running is displaying 2 action menus.
AGT-1013	Error from Online Viewer when signing out with Firefox.

AGT-1042	Signature page is not of the same width as the main document
AGT-1047	Switching language on password reset page after having a validation issue on the new password generates an error.
AGT-1049	In add document form, changing from an artifact with only Draft status available to one with Final available too does not display the Final option
AGT-1065	Password verification in approval task is taking a long time to complete.
AGT-1068	Missing audit trail entry for the first user added to an organization.
AGT-1074	After switching to another organization, the workspaces in the workspace drop down selector are showing the ones from the initial organization for a few seconds
AGT-1075	Role of the user or Audience that the user is part of is missing in the audit log of the "task created" event.
AGT-1076	Review workflow is stopped still when a step contains an audience that does not include a group.
AGT-1077	Artifact links continues to apply on disabled countries.
AGT-1081	Managed files that are password protected in Online Viewer and online Annotations review process.
AGT-1095	Old fashion message is displayed when converting PDF on the fly.
AGT-1099	Keep track of the user account ID for each audit log entry
AGT-1106	Support of password protected files during PDF conversion, online view, online annotation review, approval with eSignature.
AGT-1127	Verify during workflow initiation that all properties and audiences used in the workflow steps are not empty
AGT-1184	New document created jobs are not being triggered when using import folder.
AGT-1185	If parent workspace is selected for a workspace, it is not possible to unselect it.
AGT-1188	Annotations - Review with Annotations and online Viewer does not work on iPads.
AGT-1198	Extended metadata is not always shown in document properties dialog and version history.
AGT-1223	Quick Filter - Error is sometimes displayed when filtering by country name.
AGT-1230	Views containing all of the columns are not displayed properly.
AGT-1241	Deleted items should not be copied to new workspaces (artifacts, views etc.)
AGT-1242	Annotations - Comment made on a "Combobox" make the parallel review to fail when integrating the comments back into the original document.
AGT-1251	In a document properties, the document link tab does not show up until clicking on another tab.
AGT-1252	Clicking on a document link in the document property page does not work.
AGT-1265	Folders created as part of placeholder(s) and document(s) creation should have Owner, Created By and Modified By set to System account.
AGT-1266	If a user creates an artifact with placeholder, upload a document from the placeholder, obsolete the document, and delete the folder, then the folder cannot be deleted.
AGT-1273	Making obsolete a document that was previously associated with a country-specific artifact fails.

AGT-1274	Excused placeholders are removed when an artifact is excused. They should not be removed.
AGT-1276	Quick filter - Date filtering on extended metadata should work the same way as the built-in metadata (with the date range selector).
AGT-1277	When a user does not have at least one organization that the user has access to, there is an infinite loop happening after login.
AGT-1278	Change Folders Owner, Created By and Modified By to System account, for folders created by the system.
AGT-1279	Search - the 'Blank' option is displayed in the list when filtering on Owner, Author and modified by fields.
AGT-1296	Folder import cannot import Zip files that contains long files names.
AGT-1297	Extended metadata are displayed as "invalid date" on Chrome for iPhone
AGT-1300	Annotations - The comments are integrated back into the word using the UTC time, instead of using the default timezone of the lifecycle.
AGT-1314	Saving a permission level is taking a long time to bring the user back to the previous screen (like 15 seconds).
AGT-1315	User should be redirected to the organization first workspace or home page (if enabled) after approving its policy the first time the user connects.
AGT-1318	A user with a subscription expired on one organization cannot switch back to another organization once he tried to connect once to the expired organization.
AGT-1319	After a folder import, it is not possible to expand the imported folder from the tree view.
AGT-1321	A user with "Add document" permission on a folder should be able to add documents in that folder even if the user does not have the "Add document" permission at the workspace level.
AGT-1323	When moving a folder, sometimes the content of the original folder is displayed instead of the content of the parent folder after the move. Problem is fixed after navigating to another folder.
AGT-1324	It is not possible to change the document location from "/" to another folder or from another folder to "/".
AGT-1327	When importing a folder, the audit log entry of documents should include the zone, section, artifact and folder path.
AGT-1328	Artifacts links are not created for final documents imported using folder import feature.
AGT-1339	When a Users access (date in) to an Organization is not yet active, the user does not receive a message about this when signing in.
AGT-1358	User import - Organization default group is not taken into account. (When selecting "use default org group").
AGT-1362	When sending workspace notifications, the "to" field is not set.
AGT-1363	Time should be added to the user interface when displaying workspace notifications
AGT-1400	Permission Levels at a workspace level are not automatically synchronized when the synchronize option is enabled. They need to be manually turned off and on to work.

AGT-1404	Workflow - Version of a document should not change if there is no change of metadata.
AGT-1417	When importing files with accents or Scandinavian letters in their filename, the filenames get garbled.
AGT-1427	Web Form - Workflow history box is not the same width as the rest of the form in workflow tasks.
AGT-1433	Hyperlink metadata and Richtext metadata are not recorded in audit log at document creation.
AGT-1435	Pagination does not work well on translation keys in the workspace misc settings (translation tab). The last 2 keys of the first page are also as the first 2 keys of the second page.
AGT-1456	Web Form - Discard check out option is not displayed when opening a form using the document link in views.
AGT-1462	In the import user wizard, uploading a wrong file type in the wizard generates an error, but the spinning wheel does not disappear.
AGT-1473	Sometimes cancel workflow operation throws an error to the user.
AGT-1474	Rich text fields and hyperlinks don't work in the import folder screen.
AGT-1491	Upload to Final is not available on new workspaces with no default lifecycle even if upload to final is set in the default organization level or global administration lifecycle (for Agatha Support only).
AGT-1493	Create from placeholder should not show the "Create from template" option if the corresponding artifact does not have "Create from template" activated.
AGT-1498	Cannot convert PDF that contains hyperlink (in some cases).
AGT-1500	In artifact settings, errors in another tab are not displayed when trying to save from the second tab.
AGT-1508	Filtering on a document name within a folder does not only display the documents included in the current folder.
AGT-1511	Extended metadata date is flagged as "modified" in the version history even if it did not change.
AGT-1514	Web Forms - Rich text is not automatically refreshing in views after saving. Page needs to be reloaded for it to show up.
AGT-1516	Workspace start date and end date are not properly replaced in the Microsoft Word document properties.
AGT-1519	Import folder does not work if the user does not have Import Permission at the workspace level even if the user has permission on the current folder.
AGT-1522	Error checking-in document "No rendition found".
AGT-1532	Web Form - provide the ability to define the height of the rich text metadata in the form definition.
AGT-1534	Mail sending error "Service not available, closing transmission channel. The server response was: Timeout waiting for data from client."
AGT-1544	Due dates don't taken care of the timezone of the user properly.
AGT-1563	Folder imports with many files(+200)/large(+200mb) zip files fail in some cases.
